Github: <https://github.com/Fishman004> |

LinkedIn: <https://www.linkedin.com/in/james-fisher-9598ab212/>

## Education

---

**California State University, Monterey Bay | Seaside, CA**  
**Computer Science | 05/2026**

## Experience

---

**Apple | Monterey, CA**  
**Specialist | 07/2025 - 01/2026**

- Delivered high-volume technical consultations in fast-paced retail environment (5:1 customer ratio)
- Diagnosed and resolved iOS/macOS configuration issues
- Guided device onboarding, ecosystem integration, and cloud sync troubleshooting
- Consistently exceeded performance benchmarks in customer satisfaction metrics

## Projects

---

**F1 Data API (Team Project, In Progress) | Spring Boot, Java, OAuth2**

Github: <https://github.com/CST438-Group1/Project-2>

- Implemented initial REST endpoint structure using Spring Boot controllers
- Designing Controller–Service architecture for scalable backend expansion
- Collaborating using Git-based pull request workflow

**Dad Jokes Android App (Team Project) | Kotlin, Android, REST, Room**

Github: [https://github.com/sungmin-park-01/CST438\\_project01](https://github.com/sungmin-park-01/CST438_project01)

- Developed Android app using Kotlin that consumes iHazDadJoke REST API
- Implemented Room-based persistence for user login and favorites
- Integrated Retrofit network layer with structured error handling

**Weather Now (Team Project) | Node.js, Express, EJS/HTML, Weather API**

Github: <https://github.com/iFernandez96/WeatherNow>

- Built server-rendered web app using Node.js and Express to fetch live weather data
- Implemented routing, validation, and error handling
- Deployed to FastComet

## Technical Skills

---

Languages: Java, Kotlin, Python, JavaScript, C++

Frameworks/Tools: Spring Boot, Node.js, Express, Android, Retrofit, Room, JPA, Docker, Git

Cloud: AWS CCP, Azure Fundamentals, Google Cloud Cybersecurity
